이제 政府樹立後 처음으로 糧穀統計年報의 出刊을 보게 되었습니다. 糧穀統計年報의 出刊은 오랫동안 企劃하고 準備해왔던 것입니다.

우리나라의 糧政은 政府樹立 以後 自由去來를 原則으로 하고 一面 政府管理란 二元制度를 持續해 왔으며 그間 몇 차례에 걸쳐 穀價波動 및 食糧難을 겪었으나 政府의 糧穀管理는 國民食糧의 解決과 穀價維持 나아가서 經濟安定을 爲하여 貢獻한 바 크다고 하겠습니다.

糧政은 國民食糧의 圓滑한 需給과 穀價의 適正水準維持란 命題를 지니고 基本的이면서도 深刻한 問題에 直面하고 있습니다. 例하면 莫大한 糧穀의 絶對量不足 人口의 急激한 膨脹에 따른 食糧의 追加需要 自然條件의 制約을 크게 받고 있는 食糧生産 脆弱한 糧穀市場의 育成 外換事情의 逼迫等 難題들이 앞에 가로 놓여 있습니다. 이의 解決이 短時日內에 쉽사리 이루어질 것은 아니라 할지라도 그對策을 眞摯하게 摸索하여 하루속히 國民食生活의 安定을 圖謀하여야 할 것입니다.

이러한 基本的인 糧穀政策을 摸索함에 있어서 또는 研究分析함에 있어서 그리고 實務遂行에 있어서 널리 利用될수 있도록 本年報에는 糧穀에 關한 統計資料를 廣範圍하게 收錄하였습니다. 政府管理糧穀에 關해서는 需給 價格 加工 操作 保管 檢査에 이르기까지 全體食糧에 關해서는 生産 導入 需給 流通 等の 資料를 網羅하였으며 糧穀管理特別會計의 豫算關係및 外國의 糧穀關係資料도 收錄하였습니다. 그러나 未備한 點에 對해서는 앞으로 補完하고자 합니다.

끝으로 本年報의 發刊에 手酷한 職員 및 資料蒐集에 積極 協助하여주신 關係機關에 對하여 深甚한 謝意를 表하는 바입니다.

Foreword

It is our great pleasure to publish this Grain Statistics Year-book. Since the establishment of our Government, we have had a dualistic grain policy which combined a free market system with essential Government controls. Although a number of grain crises and wide grain price fluctuations have occurred in the past, we believe that grain control by the Government has made a great contribution to solving the national food problem, maintenance of grain prices and stabilization of the national economy.

Our grain policy today aims at the smooth supply of national food and maintenance of an optimal level of grain prices, but continuously faces basic and serious problems. These problems include a substantial shortage of grain, increasing grain demand created by rapidly increasing population, grain production limited by natural conditions, an underdeveloped grain market and a shortage of foreign exchange.

We have spared no effort to present in this Year-book comprehensive materials on food grains for those engaged in food administration and also for those who intend to study and analyze basic grain policy. This Year-book contains for Government grain management data on requirements and supply, prices, processing (milling), handling, storage and inspection. For the over-all estimates of food demand and supply it contains data on production, imports, demand, supply and marketing. We are ready to supplement the contents as our experience teaches us in the future.

I wish to express particular appreciation to my staff for their successful performance of this task and to those organizations which so willingly cooperated in the collection of related data used in this publication.

① Price difference ratio of polished barley 86 was revised to 70 by the Committee of Agriculture & Forestry of the National Assembly in 1955, because ratio were not reasonable with regard to economic situation, and accordingly price difference ratio of other cereals were revised

② Price difference ratio of polished barley 70 was considered too high comparing with the prices of imported grains calculated on the basis of foreign exchange rate of 500 to 1 and accordingly revised in 1957 by the Committee of Agriculture & Forestry of the National Assembly

③ As price difference ratio of wheat flour 78 was too high compared with cost prices of imported grains and market prices the Government requested the approval of revision of wheat flour price difference ratio to 69 to the National Assembly which revised to 59.6

④ Revision of cereals price difference ratio in 1962, was caused by raising extraction rate of barley from 72% to 64%, increasing handling charge, and cost prices of imported grains caused by hiking of foreign exchange rate

⑤ Revision of price difference ratio in 1963, as following,

A Price difference ratio of polished barley and pressed barley were revised for the raising purchasing prices and importing costs

B Should price difference ratio of soybeans, spotted soybeans and maize raise by the same rate as rice, it would be higher than market price, and price difference ratio left unredeemed as the previous year

C Price difference ratio of red beans wheat and wheat flour were revised under the consideration of market prices
